

## 1. Product Specification

Item	Smart home hub
Color	White
Power Supply	DC 5V/1A
Wireless standard	Wi-Fi IEEE802.11b/g/n@2.4 GHZ ZigBee IEEE802.15.4
Operating Temperature	-10°C — +50°C
Operating Humidity	0% — 95% RH

## 2. Diagram of Installation

Place it as close to the center of the home as possible to maximise wireless coverage.

## 3. Troubleshooting Methods

Problem	Solution
Unable to pair connection	Check if the Wi-Fi password is correct. Reset the hub.
Drops after pairing	Reset the hub
Cannot disassociated	Uninstall the hub and install again.

## 4. Pair the connection

Connect the port to the adapter, place the hub as close as possible to the router, add the hub in the APP.

Serial No	Name of port	Instruction
①	Add/Delete Button	Add the smart device by pressing the button thrice/To delete the smart Device Press the button longer than 5 seconds.
②	Reset Button	Press the button for 5 seconds and longer to reset the gateway and disassociating your app account.
③	Ethernet Port	Allow internet connection for other devices.
④	Data Port	Reserved
⑤	Power Port	Connect to DC adapter(5V/1A)

Serial No	Name of port	Instruction
①	Power indicator	Indicating normal to access the power if the light shine.
②	Operating indicator	Flash 6 times if the Hub resets. Slow flashing light indicates the Hub is waiting to be configured for reset. A continuous streak of light indicates the network configuration is successful.
③	Ethernet Port	Allow internet connection for other devices.
④	Data Port	Reserved

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
